

BoxStation

The innovative solution for container parking

BoxStation by Logocar makes temporary storage of containers efficient and easy. In a few minutes, a container or swap body can be securely stored, allowing the driver and lorry to be operational once again in no time at all.

Advantages

- **Saving time and costs** by unloading and loading containers or swap bodies
- **No detaching** – The chassis and lorry are available right away
- **Compatible** with intermodal containers and standard swap bodies
- Adjustable to **individual requirements**
- Can support containers up to **36 tons**
- Adaptable to **all chassis heights**
- **Temporary storage** of containers and swap bodies for just-in-time delivery

Fast and efficient

Parking

- Lorry drives on to BoxStation
- Driver attaches stilts to container or swap body
- Chassis is lowered
- Lorry drives out of the BoxStation and the container or swap body is placed

Picking up

- Lorry drives on to BoxStation
- Chassis is raised
- Driver folds' stilts aside
- Lorry drives out of BoxStation and is once again operational

Compatibility

The BoxStation can be placed directly at any ramp. Therefore, containers and swap bodies can be easily unloaded and loaded. Lorries without containers can still drive to the ramp and onto the BoxStation and be handled without the BoxStation interfering.

Due to the different stilts that are available, the BoxStation is suited for intermodal containers as well as swap bodies. Containers up to 36 tons can be placed on the BoxStation and be unloaded or loaded by a forklift (weighing up to 4 tons).

Attached stilts on a swap body

Double BoxStation for 20', 40' and swap body

Versions

The following customized variations of the BoxStation are available.

Parking Positions	Type and length of container					
	20'	30'	40'	45'	swap body	20' / swap body
Single	x	x	x	x	x	x
Double	x				x	x

The BoxStation can be ordered now, with an estimated delivery time of about three months.

Please do not hesitate to contact us for further inquiries. We would be glad to answer all your questions and send you a custom proposal that meets your individual needs.
